INDEPENDENT AUDITOR'S LIMITED REVIEW REPORT

To the Board of Directors

Dar Al Arkan Real Estate Development Company

(A Saudi Joint Stock Company)

Riyadh – Kingdom of Saudi Arabia)

Introduction:

We have reviewed the accompanying interim condensed consolidated statement of financial position of **Dar Al Arkan Real Estate Development Company** (A Saudi joint stock company) and its subsidiaries (the "Group") as at March 31, 2016 and the related interim condensed consolidated statements of profit or loss and the other comprehensive income, cash flows and changes of shareholders' equity for the three-month period then ended and the related notes from (1) to (26) which form an integral part of these interim condensed financial statements. The Company's management is responsible for the preparation and presentation of these Interim condensed consolidated financial statements in accordance with International Accounting Standard No. 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

Scope of Review:

We conducted our review in accordance with auditing standards generally accepted in the kingdom of Saudi Arabia applicable to limited review engagements and with international standard of review engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of the interim financial statements consists principally of applying analytical procedures to financial data and making inquiries of the persons responsible for financial and accounting matters. A limited review is substantially less in scope than the audit conducted in accordance with the Auditing Standards Generally Accepted in the Kingdom of Saudi Arabia and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express such an audit opinion.

AlKharashi & Co.

Certified Accountants And Auditors

Conclusion:

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with International Accounting Standard No. 34.

Emphasis of a Matter:

This report is issued in conformity with international financial Reporting Standards for management purposes and should not be considered as a replacement to the Company's interim condensed consolidated financial statements issued in accordance with Generally Accepted Accounting Principles in the Kingdom of Saudi Arabia.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 BASIS OF PREPARATION

The interim condensed consolidated financial statements have been prepared in accordance with the International Accounting Standard No. 34 – "Interim Financial Reporting", consistent with the Group's accounting policies.

These interim condensed consolidated financial statements are presented in Saudi Riyals (SR), which is the Group's functional currency.

2.2 ADOPTION OF NEW AND REVISED STANDARDS AND INTERPRETATIONS

Standards and interpretations effective in the current period

In the current period, the Group has adopted all new Interpretations issued by the International Financial Reporting Interpretation Committee ("IFRIC") that are mandatory for adoption in the annual periods beginning on or after 1 January 2016.

IFRS 5	Amendments	- Changes in methods of disposal for non-current assets held for sale and discontinued operations
IFRS 7	Amendments	- Financial Instruments - servicing contracts and applicability of the amendments to IFRS 7 to condensed interim financial statements
IFRS 10	Amendments	- Consolidated financial statements - Investment Entities: Applying the Consolidation Exception

2.3 ACCOUNTING CONVENTION

The interim condensed consolidated financial statements have been prepared on the historical cost basis, as modified by the revaluation of certain financial instruments at fair value and investment in associates at equity method. The principal accounting policies are set out below.

2.4 BASIS OF CONSOLIDATION

The interim condensed consolidated financial statements of the Group incorporate the financial statements of the Company and enterprises controlled by the Company (its subsidiaries) made up to 31 March 2016.

Subsidiaries

Subsidiaries are entities that are controlled by the Group. The Group controls an entity when, it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over that entity. Subsidiaries are fully consolidated from the effective date of acquisition or up to the effective date of disposal, as appropriate.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are initially measured at fair value at the acquisition date irrespective of the extent of any non-controlling interests. The interests of non-controlling shareholders are stated at the non-controlling proportion of the fair values of the assets and liabilities recognised. Subsequently, any losses applicable to the non-controlling interests in excess of the non-controlling interests are allocated against the interests of the parent.

The excess of cost of acquisition over the fair value of the Group's share of identifiable net assets acquired is recognised as goodwill. Any deficiency of the cost of acquisition below the fair value of identifiable net assets acquired (i.e. discount on acquisition) is recognised directly in the interim condensed consolidated statement of profit or loss and comprehensive income.

All intra-group transactions, balances, and unrealised gains on transactions between Group companies are eliminated on consolidation. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Investments in associates

An associate is an entity over which the Group is in a position to exercise significant influence, but not control or joint control, through participation in the financial and operating policy decisions of the investee.

The results, assets and liabilities of associates are incorporated in these interim condensed consolidated financial statements using the equity method of accounting except when classified as held for sale. Investments in associates are carried in the interim condensed consolidated financial position at cost as adjusted by the post-acquisition changes in the Group's share of the net assets of the associate, less any impairment in the value of individual investments. Losses of the associates in excess of the Group's interests in those associates are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

When a partial sale of an associate result in losing significant influence over that associate, the remaining investment is measured at fair value on the date of sale and recognised as a financial asset. The difference between the attributable share of carrying amount for the retaining interest in that associate and its fair value is included in the determination of gain or loss of the disposal of the associates. In addition, the Group reclassifies the gains or losses from equity, previously recognised in the other comprehensive income to the statement of profit or loss and comprehensive income.

Any excess of cost of acquisition over the Group's share of the fair values of identifiable net assets of the associate or joint venture at the date of acquisition is recognised as goodwill. The goodwill is included within the carrying amount of the investment and is assessed for impairment as part of that investment. Any deficiency of the cost of acquisition below the Group's share of the fair values of identifiable net assets of the associate or joint venture at the date of acquisition (i.e. discount on acquisition) is recognised in the interim condensed consolidated statement of profit or loss and comprehensive income.

Where a Group company transacts with an associate or joint venture of the Group, profits and losses are eliminated to the extent of the Group's interests in the relevant associate or joint venture. Losses may provide evidence of an impairment of the asset transferred in which case appropriate provision is made for impairment.

2.5 PROPERTY AND EQUIPMENT

Property and equipment are stated at cost less accumulated depreciation and any recognised impairment loss. Cost includes all directly attributable expenses incurred in bringing the property and equipment to their present location, condition until the property and equipment is available for use.

Depreciation is charged so as to write off the cost less estimated residual value of assets, other than land, over their estimated useful lives, using the straight-line method, on the following rates:

Buildings	3%
Leasehold improvements	5% - 20%
Vehicles	25%
Machinery and tools	20%
Office equipment	20% - 25%

The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in interim condensed consolidated profit or loss.

At each reporting date, the Group reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Where

**DAR AL ARKAN REAL ESTATE DEVELOPMENT COMPANY
SAUDI JOINT STOCK COMPANY**

**NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
FOR THE THREE-MONTH PERIOD ENDED 31 MARCH 2016 (CONTINUED)**

the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised in interim condensed consolidated profit or loss immediately.

2.6 INVESTMENT PROPERTIES

Investment properties, which are properties held to earn rentals and/or for capital appreciation, are stated at cost less accumulated depreciation and any recognised impairment loss. Depreciation is charged so as to write off the cost less estimated residual value of assets, other than land and properties under construction, over their estimated useful lives, using the straight-line method, on the following basis:

Buildings	3%
-----------	----

Gains or losses arising from the retirement or disposal of investment properties being the difference between the net disposal proceeds and carrying value are included in the interim condensed consolidated profit or loss for the period of the retirement/disposal except those that relate to sale and leaseback arrangements.

2.7 DEVELOPMENT PROPERTIES

Development properties principally comprise completed projects (including properties held for sale and developed land held for sale) and projects under development (including property projects under construction, land projects under development and land waiting for development). Projects under development include those properties in progress of development or waiting for development to commence.

All development properties are accounted for at the lower of cost and net realisable value. Cost comprises direct material cost, direct labour costs, borrowing costs and those overheads that have been incurred in bringing the development properties to their present location and condition. Cost is calculated using the average method. Net realisable value represents the estimated selling price less all estimated costs to completion and selling costs to be incurred.

The operating cycle of development properties is such that the majority of development properties will not be realised within 12 months. These have been split between non-current and current development properties.

2.8 IMPAIRMENT OF TANGIBLE ASSETS

At each reporting date, the Group reviews the carrying amounts of its tangible assets for any indication that those assets have suffered impairment losses. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified. When such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised in the interim condensed consolidated profit or loss.

SAUDI JOINT STOCK COMPANY

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
FOR THE THREE-MONTH PERIOD ENDED 31 MARCH 2016 (CONTINUED)

2.9 ISLAMIC BORROWING COSTS

Islamic borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised as finance costs in the interim condensed consolidated profit or loss in the period in which they are incurred.

2.10 FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are recognised on the Group's interim condensed consolidated statement of financial position when the Group has become a party to the contractual provisions of the instrument.

Trade receivables

Trade receivables are classified as loans and receivables and are initially recognised at fair value. They are subsequently measured at their amortised cost using the effective interest rate method less any provision for impairment. A provision for impairment is made where there is objective evidence, including customers with financial difficulties or in default on payments, that amounts will not be recovered in accordance with original terms of the agreement. An allowance for impairment is recognised when the carrying value of the receivable exceeds the present value of the future cash flow discounted using the original effective commission rate. The carrying value of the receivable is reduced through the use of an allowance account and any impairment loss is recognised in the interim condensed consolidated profit or loss.

Cash and cash equivalents

Cash and cash equivalents comprise cash in hand and at bank and other short-term deposits held by the Group with original maturities of three months or less.

Held for trading investments

Held for trading investments are recognised initially at fair value; transaction costs are taken directly to the interim condensed consolidated statement of income and thereafter stated at fair value by reference to exchange quoted market bid prices at the close of business on the interim condensed consolidated balance sheet date. The unrealized and realized gains and losses from sale of held for trading investments are recorded in the interim condensed consolidated statement of income.

Financial liabilities

Financial liabilities include Islamic Sukuk and Islamic Murabaha and are classified according to the substance of the respective contractual arrangement and are initially measured at their fair value, net of transaction costs. Financial liabilities are subsequently carried at their amortised cost, with commission cost being recognised on an effective yield basis in the interim condensed consolidated statement of profit or loss over the term of the instrument.

Trade payables

Trade payables are initially recognised at fair value and subsequently at amortised cost using the effective interest rate method.

Islamic variable financial instruments

The Group designates certain hedging instruments, which include Islamic variable financial instruments in respect of foreign currency risk, as either fair value hedges, cash flow hedges, or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as a cash flow hedges.

The Group initially recognises Islamic variable financial instruments as either a financial asset or a financial liability, at fair value, and subsequently re-measured to their fair value at the end of each reporting period. The accounting for changes in the fair value of an Islamic variable financial instrument depends on the intended use and the resulting designation of the Islamic variable financial instrument. The resulting gain or loss is recognised

**DAR AL ARKAN REAL ESTATE DEVELOPMENT COMPANY
SAUDI JOINT STOCK COMPANY**

**NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
FOR THE THREE-MONTH PERIOD ENDED 31 MARCH 2016 (CONTINUED)**

in the interim condensed consolidated statement of profit or loss immediately, unless the Islamic variable financial instrument is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

For an Islamic variable financial instrument designated as a fair value hedge, the gain or loss is recognised in the interim condensed consolidated statement of profit or loss in the period of change together with the offsetting loss or gain on the hedged item attributed to the risk being hedged. Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.

2.11 REVENUE RECOGNITION

Revenue represents the sale of development properties and rental activities. Revenue for sale of development properties is recognised to the extent that it is probable that economic benefits will flow to the Group and significant risks and rewards of ownership have been transferred to the buyer, which is assessed to be at the time of legal completion of the sale or unconditional exchange. Revenue is measured at the fair value of consideration received. With respect to rental income, the Group recognises revenue on a straight line basis over the lease term.

2.12 ZAKAT

Zakat is calculated pursuant to Zakat Regulation in the Kingdom of Saudi Arabia and recognised in the interim condensed consolidated statement of profit or loss in each period. The provision is based on an estimate of Zakat that is adjusted in the financial period in which the final assessment of Zakat is issued. Any change in the estimate resulting from the final assessment is recognised in that period.

2.13 FOREIGN CURRENCIES

Transactions in currencies other than Saudi Riyals, the presentational and functional currency of each subsidiary within the Group, are recorded at the rates of exchange prevailing on the dates of the transactions. At the reporting date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary assets and liabilities carried at fair value, that are denominated in foreign currencies, are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. The resulting exchange gains or losses are recognised in the interim condensed consolidated statement of profit or loss and comprehensive income.

2.14 STATUTORY RESERVE

According to the article (125) of the Companies' Regulation, the Group is required to retain 10% of net income in the statutory reserve. The Group may stop the transfers when this reserve reaches 50% of the share capital. This reserve is not available for dividend distribution.

2.15 END OF SERVICE INDEMNITIES

The Group provides end of service benefits to its employees in accordance with the labour law provisions of Saudi Arabia. The entitlement to these indemnities is based upon the employee's final salary, length of service and the completion of a minimum service period. The costs of these indemnities are accrued over the period of employment, based on the estimated ultimate payment.

2.16 RETIREMENT BENEFIT COSTS

The Group makes contributions in line with the General Organisation for Social Insurance Regulations and are calculated as a percentage of employees' wages. Payments made to state-managed retirement benefit schemes are dealt with as payments to defined contribution plans where the Group's obligations under the schemes are equivalent to those arising in a defined contribution retirement benefit plan. Payments made to defined contribution retirement benefit plans are charged as an expense as they fall due.

2.17 LEASING

Rentals payable under operating leases are charged to the interim condensed consolidated profit or loss on a straight-line basis over the term of the relevant lease.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

Estimates and judgments are continually evaluated and are based on historical experience, internal controls, advice from external experts and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting judgments will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial periods are discussed below:

Revenue Recognition

The Group recognises revenue on its development properties when significant risks and rewards of ownership transfer to the buyer, which is assessed to be at the time of legal completion of the sale or unconditional exchange.

With respect to land projects, the Group receives an initial non-refundable deposit upon signing the sale contract with the balance being paid on a deferred basis, which typically does not exceed three months. The Group recognises the full amount of the consideration at the time the sale contract is signed.

With respect to residential and commercial projects, The Group typically receives an initial deposit on the signature of the sales contract and a final payment on delivery of the units. Revenue from the sale of these properties is only recognized when the completed property is delivered to the purchaser.

With respect to rental income, the Group recognises revenue on a straight line basis over the lease term.

Recognition of cost of sales

The Group has developments which typically contain a number of individual projects within each development. In order to determine cost of sales related to properties or units sold during the period, management must estimate and to average the costs of the entire development, including infrastructure costs and overall construction costs. These costs must then be allocated to each project within the development and each unit within a project. These estimates are reviewed regularly on a profit per project basis and revised as necessary. Any significant change in these estimates may result in additional costs being recorded in future periods related to revenue recognised in a prior period.

Classification of properties

The Group's properties are classified as either development properties or investment properties. Management has made various judgments to determine whether a property qualifies as an investment property (properties held to earn rentals and/or for capital appreciation) or as a development property that comprises properties held for sale, developed land held for sale, property projects under construction, land projects under development and land awaiting development. In making its judgment, management considers its intended use of property. When management assess that certain investment properties will be disposed off, their carrying cost will be

DAR AL ARKAN REAL ESTATE DEVELOPMENT COMPANY
SAUDI JOINT STOCK COMPANY

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
FOR THE THREE-MONTH PERIOD ENDED 31 MARCH 2016 (CONTINUED)

transferred to development properties as long as they are under development and not generating revenues. Further, at each reporting date management categorises individual projects as long term or short term depending on its estimated completion date. If a completion date is expected to be within a year of the interim condensed consolidated statement of financial position date, the project is classified as current.

Investment Properties

Investment properties are the interests in land and/or buildings that are held for their investment potential for generating lease revenues and/or capital appreciation or both. These are not used for generating sales revenues through normal business operations. The investment properties are initially recognised at cost and the cost of an acquisition is measured at fair value of the assets acquired/transferred. All developments costs directly attributable to the properties are capitalized to derive the total cost. Current carrying cost represents total cost for under construction properties and for the completed properties it is total cost less accumulated depreciation and impairments, if any. During the construction phase the management does not believe the fair values are reliably determinable, however the group encourages independent valuation for the completed properties, to assess their fair value, wherever appropriate and reliable. Any sustained depletion in the fair value of a property compared to its current cost is recognised as impairment loss in the interim condensed consolidated profit or loss.

Carrying value of development properties

The Group's principal activity is currently the development and sale of land and the development and sale of residential and commercial property. Due to the nature of this activity, much of the development is speculative in nature. Accordingly, the interim condensed consolidated statement of financial position at 31 December 2015 reflects current assets that are not covered by forward sales contracts.

The Group assesses the net realisable value of its investment properties and its development properties at each reporting date. This assessment is based on a profit per project basis and compares the carrying and future costs to the expected selling price per unit based on historical activities. As a result of this process, there have been no instances where the estimated net realisable value of the site was less than its current carrying value within the interim condensed consolidated statement of financial position. A change of these estimates in the future could have an impact on the valuation of the development properties.

4. REPORTING SEGMENTS

Management has organised the Group into three segments for the purpose of reporting to the chief operating decision maker. Management develops its strategic planning and business model around these segments that consist of:

- Projects – the development of basic infrastructure on undeveloped land ("Land Projects") and the development of residential and commercial projects and the sale of units on such projects ("Residential and Commercial Projects").
- Investments – the investment in companies that Management believes are complementary to the Group's real estate development operations.
- Properties – management of properties that the Group has retained as rental properties including commercial and residential units on its Master-Planned Communities.

The Group does not allocate share of profits of associates, general administration, selling and marketing costs including directors' salaries, finance costs, other income and Zakat expense to its segments. Substantially all of segment operating activity (including revenue and costs) for the three-month period ended 31 March 2016 and 2015 was generated from the Projects segment and as a result there is no breakout provided of revenue and segment profit by segment. The accounting policies of the reportable segments are the same as the Group's accounting policies described in Note 2.

The Group operates exclusively in Saudi Arabia and all its revenues are derived from its portfolio of properties which the Group manages.

Included within Land projects under development is land worth SR 5.98 billion (31 December 2015: SR 5.98 billion), which represents the Group's share of co-ownership with third parties according to the contracts of land development. The amount includes SR 364.5 million (2015: SR 364.5 million) as advance paid against new project.

During the period the Group's management and directors conducted an internal review and valuation of the real estate portfolio consisting of investment properties and development properties which resulted in a fair value amounting to SR 31.30 billion (31 December 2015: SR 31.42 billion) for a total cost of SR 20.46 billion (31 December 2015: SR 20.54 billion), indicating an average uplift of 53% across the real estate portfolio. The management believes that the resultant uplift on the book value is a realistic indication of the fair value of the properties of the Group.

The movement in development properties during the three-month period ended 31 March 2016 and the year ended 31 December 2015 is as follows:

8. INVESTMENTS IN ASSOCIATES

Investments in associates represent investments in share of companies, where the Group exercises significant influence. The shares of these companies are not publicly traded. The Group's ownership in these Saudi Arabia based privately owned companies ranges from 15% to 51%. For entities where the investment is less than 20%, management believes that it is able to exert significant influence due to its involvement at board level. Movement in investments in associates is as follows:

c. Analysis of borrowings:

This represents SR 4.3 billion of Islamic Sukuk comprising:

- 1) SR 1.69 billion (USD 450 million) of Islamic Sukuk carried in the books of the Group, issued by Dar Al-Arkan Sukuk Company Ltd. at 5.75% and maturing in 2018.
- 2) SR 1.12 billion (USD 300 million) of Islamic Sukuk carried in the books of the Group, issued by Dar Al-Arkan Sukuk Company Ltd. at 5.75% and maturing in 2016.
- 3) SR 1.50 billion (USD 400 million) of Islamic Sukuk carried in the books of the Group, issued by Dar Al-Arkan Sukuk Company Ltd. at 6.5% and maturing in 2019.

Islamic Sukuks listed above are denoted in US dollars. Since the Saudi Arabian Riyal is limited to fluctuations in the US Dollar there is no exposure to foreign exchange risk. The investment profit is payable to the Saudi SPV, through which the Sukuk was issued, by the sale of properties owned by the Group. The beneficiary rights of these properties are with Dar Al Arkan Real Estate Development Company and its subsidiaries with the rights to buy back the ownership of these properties upon the full repayment of the Sukuk. The Group has issued a corporate guarantee to the Sukuk holders.

The Sukuk agreements include financial covenants, which the Group was in compliance with as at 31 March 2016.

For the three-month period ended 31 March 2016 and the year ended 31 December 2015, no other transactions are entered into with entities that have common Board Members or Shareholders to the Group.

In addition, the Group entered into certain other transactions with related parties that did not have a significant impact on the financial position or comprehensive income of the Group.

See also note 8.

21. RETIREMENT BENEFIT PLANS

The Group makes payments to defined contribution retirement benefit plans in the form of the General Organisation of Social Insurance that are charged as an expense as they fall due. Payments are made on the basis of a percentage of qualifying salary for certain employees to this state-managed scheme.

The total cost charged to the interim condensed consolidated statement of profit or loss and comprehensive income for the three-month period ended 31 March 2016 was SR 0.93 million (31 March 2015: SR 0.73 million), and the outstanding contribution as at 31 March 2016 is SR 215 thousand (31 December 2015: SR 265 thousand).

22. CAPITAL MANAGEMENT

The executive committee reviews the capital structure of the Group on a semi-annual basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital. The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to its parent company through optimisation of debt and equity balances. The Group's overall strategy remains unchanged from 2007, when the Group diversified its sources of funding and issued two medium term Sukuks ranging from 3-5 years. Considering the track record of timely repayment of the first two Sukuk and the group expertise developed over the past five years to access international markets for shariah' compliant funding, the management continue to maintain its relationship with the capital markets and monitor the markets for future issuance. The Group adhere to international best practices in corporate governance and consider the capital market transactions to create additional shareholders value.

The capital structure of the Group consists of net debt (borrowings adjusted with cash and cash equivalents) and equity (comprising share capital, statutory reserve, and retained earnings). The Group is not subject to any externally imposed capital requirements.

Gearing ratio

The Group consistently monitors its gearing ratio, to ensure compliance with external covenant requirements.

The gearing ratio at end of the reporting period was as follows:

	Three-month period ended 31 March 2016 (Unaudited) SR 000	Year ended 31 December 2015 (Audited) SR 000
Islamic borrowings	6,239,554	6,292,562
Cash and cash equivalents and short term deposits	(1,484,322)	(1,001,061)
Net debt	4,755,232	5,291,501
Shareholders' equity	17,984,526	17,926,673
Net debt to equity ratio	26%	30%

23. FINANCIAL RISK MANAGEMENT

The Group's principal financial liabilities are mainly comprised of Islamic Murabaha (term and annual revolving) facilities taken from banks, issue of Islamic Sukuk, trade payable and other payables to contractors and suppliers. The paramount objectives of these financial instruments are to raise the funding base for various projects as well as for the working capital requirement of the Group.

The Group also has financial assets in the form of bank deposits, cash in hand, due from related parties and trade and other receivables, which are integral and directly derived out of its regular business. On the reporting date the Group has not entered into any non-Islamic financial variable instrument contracts by way of currency hedging, commission rate swap agreements or similar instruments.

The Group's financial operations are subject to the following risks:

1. Credit Risk
2. Commission Rate Risk
3. Liquidity Risk
4. Foreign Currency Risk
5. Islamic financial variable instrument

Credit Risk

The Credit Risk can be defined as a loss of value of an asset as a result of a failure by a customer or a counter party to such commercially valid and legally enforceable contract to comply with its obligations.

The general sales policy of the Group is "No Credit" terms, but in some cases there are enhanced payment schedules or staggered payment request by selected customers which have been accommodated. In such cases the Group has an exposure of credit risk with respect to the amount due from those customers. However, in such cases the Group holds back the final delivery or possession of the property to mitigate the risk until the full amount due is paid to the satisfaction of the contract. The monitoring and follow up of balances is completed regularly and as a result the Group's exposure to losses is limited.

With respect to the credit risk exposure of other financial assets, namely, due from related parties, bank deposits and trade and other receivables, the maximum credit risk of the Group is limited to their carrying values, in case there is a failure of the other party to meet its obligation.

As of the reporting date, the Group does not have significant credit risk concentration with any single party or a group.

Commission Rate Risk

Commission Rate Risk is associated with a change in the commission rate available when renegotiating financial instruments that are influenced by the current global financial market conditions. The Group is exposed to commission rate risk with respect to its floating commission covenants agreed for its Islamic Murabaha (revolving credit) facilities obtained from local banks.

The short term revolving borrowings' rates are renegotiated at every renewal proposal to achieve the best possible commission rate to reflect the given financial credentials and related risk perception of the Group.

The Group has a specific shariah' complaint commission rate swap contract to manage its commission rate risk. The Group's international borrowing commission rates are primarily based on LIBOR and its local borrowings are based on SAIBOR. Hence the commission rate exposure of the Group is variable according to the changes in the LIBOR & SAIBOR.

The commission rate sensitivity analysis is performed based on the commission rate exposure of the Group for floating rate liabilities outstanding at the reporting date. The calculations are done on floating commission rates assuming the liabilities outstanding for a whole year as at the reporting date.

During the period under review the average rate of 3 months LIBOR varied between 0.61% and 0.64% (0.25% and 0.27% for 2015) and SAIBOR varied between 1.55% and 1.80% (0.77% and 0.86% for 2015).

The sensitivity of commission rate variance on the Group's external borrowings which affects the interim condensed consolidated financial statements of the Group is shown below:

	Three-month period ended 31 March 2016 (Unaudited)	Year ended 31 December 2015 (Audited)
	SR 000	SR 000
+ 25 basis points	5,041	5,194
- 25 basis points	(5,041)	(5,194)

The net profit of the Group for the reported period would have been affected by the above amount as a result of such changes in floating commission rates. If there is any capitalisation of borrowing costs directly

DAR AL ARKAN REAL ESTATE DEVELOPMENT COMPANY
SAUDI JOINT STOCK COMPANY

NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
FOR THE THREE-MONTH PERIOD ENDED 31 MARCH 2016 (CONTINUED)

attributed to projects in progress, there would be timing differences on such an impact to the Group's current profit and loss account and the current impact would be nil as there is no capitalisation for the current period and historically, the management capitalises approximately 10% of borrowing costs to projects in progress as explained in note 2.9.

Liquidity Risk

Liquidity Risk can result from a difficulty to meet the financial commitments and obligations of the Group as per the agreed terms and covenants.

To mitigate the liquidity risk and associated losses of business and brand value opportunities; the Group, where possible, keeps sufficient liquid assets in all business conditions. The Group refrains from funding its long term capital requirements through short term borrowings and related party current account transactions. Currently the long term projects are funded from long term or revolving borrowings only. The Group also has a dynamic cash flow assessment policy and system by which it can estimate and plan the maturities as well as required resources to meet such obligations.

The total weighted average effective annual commission rate for the three-month period ended 31 March 2016 is 5.6% (31 December 2015: 5.5%)

See notes 12 and 14 for further details.

Foreign Currency Risk

Foreign Currency Risk is associated with the change in the value of the carrying value in the functional currency due to the variation of the underlying foreign currency obligation or right by way of transaction or translation reasons. The functional currency of the Group is the Saudi Riyal that is pegged against the US Dollar with a fixed exchange rate of 3.75 Saudi Riyals per US Dollar. Since transactions, other than US Dollars, are negligible; the Group does not assume any significant foreign currency risk.

Islamic financial variable Instruments Risk

As part of its asset and liability management, the Group uses Islamic finance variable instruments for hedging its exposure to commission rate and cash flow risks. This is generally achieved by hedging specific transactions. The Group uses Islamic finance variable instruments primarily to manage exposures to foreign currency and commission rate risks. The Group's principal objective in holding Islamic finance variable instruments is to reduce the cash outflows associated with changes in foreign currency and fixed commission rates. The Group's Islamic finance variable instruments are exposed to credit risk to the extent of that counterparty's inability to meet the contractual obligations. The Group mitigates such risks by dealing with major financial institutions as its counterparties. The group Management does not expect any material losses or risk from the default of counterparties as the potential risk of such defaults is periodically monitored.

24. COMMITMENTS AND CONTIGENCIES

To complete the long term construction and development of investment and development properties, the Group have committed to a number of contractual arrangements and agreements. Such contracts are cancellable at the Group's discretion with no penalties. The estimated uncompleted contracts outstanding as at 31 March 2016 amounts to SR 49 million (31 December 2015: SR 49 million) and performance commitment through a bank guarantee for SR 74 million against receivable collected (31 December 2015: SR 74 million).

These commitments are expected to be settled within the duration of the projects in progress and shall be funded through prospective property sales and external borrowings, if necessary.

During the normal course of business there are general litigations and legal claims. Management takes legal advice as to the likelihood of success of claims and no provision is made when the action is unlikely to succeed.

At 31 March 2016, there were no significant claims notified (31 December 2015: None).

25. INTERIM RESULTS

The results of operations for the interim periods may not be a fair indication of the results of the full year operations of the Group

26. APPROVAL OF THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The interim condensed consolidated financial statements were approved by the board of directors and authorized for issue on 13 April 2016.
